

SE 492 Biweekly Report

Group 12

Make Recipes Readable Again

Client/Advisor: Mat Wymore

Team Members:

John Paton - Team Lead

Brett Knous - Meeting Scribe

Luke Knous - Test Facilitator

Vismay Gehlot - Design Facilitator

Rithwik Gokhale - Report Facilitator

Weekly Summary: The past week we split into teams and decided what we were each going to work on. The breakup is the following: John on web scraping, Brett and Rithwik on the backend, and Luke and Vismay on frontend work.

Past Week Accomplishments: Last week we got a skeleton app set up, some working backend functionality, and some web scraping up and running, moving forward we will improve this to scraping the data we intend on using, finding a method of storing it, and displaying it to users in a useful way.

Individual Contributions:

Name	Individual Contributions	This week's hours	Cumulative hours
John	Created a functional web scraping example. Coordinated meetings and team efforts.	6	6
Brett	Researched local storage options like	7	7

	JSON and Mongo DB Realm.		
Luke	Researched environments for building app. Assisted team members in setting up a development environment. Created initial draft of app home screen.	8	8
Vismay	Research on technologies for local backend.	4	4
Rithwik	Created skeleton application. Helped team members set up development environment.	4	4

Plans for the upcoming week:

- Get local data storage functional
- Expand web scraping to pull a recipe from a target website
- Create more pages for the application
- Utilize group git repo so all team members have access to the most up to date code
